"GAZOAPPARAT" PLANT UPS OUTPUT -- Moskovskiy Bol'shevik, No 186, 9 Aug 49

The Moscow "Gazoapparat" Plant regularly exceeds its growing production program. In the second quarter of 1949, it produced 272,000 rubles more of finished products than during the first quarter, and increased production 18 percent in comparison with last year. Despite increased production and the output of new and complicated products, the plant has also accelerated its turnover of working capital. For each ruble of working capital, the plant now produces 3 rubles 78 kopeks' worth of goods, whereas it produces only 2 rubles 74 kopeks' work per ruble of working capital during the second quarter of 1948. Turnover of working capital is now 57.3 days instead of 61.2 days as planned.

The plant has devoted particular attention to adopting new techniques. For example, a four-burner stove produced by the plant has more than 300 parts, most of which are stamped. By mechanizing stamping operations, the plant can now turn out up to 19,000 parts in 24 hours.
